

MERRIGNEE

MERINO & POLL MERINO STUD

C.T. MERRIMAN & SON, BOOROWA NSW

HAMILTON SHEEPVENTION 2016 SALE • TUESDAY 2nd AUGUST

MERRIGNEE WILL HAVE THEIR USUAL TEAM OF FIVE RAMS AT SHEEPVENTION

Hamilton Sheepvention Merino Ram Sale on 2nd August 2016 is a high quality sale and Merrignee has been selling there since 1991. Merrignee rams will be available for inspection all day on Monday 1st August and before the sale commences on the Tuesday, 10am.

This year's sale team from Merrignee is a very good team of Stud Superfine and Fine wool merino rams. The group have low microns along with very good comfort factors, ranging from 99.8 to 99.9. Their fleece figures, along with low SDs and CVs, give buyers confidence of the genetic repeatability of our merino sires.

Clients and interested people are welcome to view the rams before they go to Hamilton. Just contact Charlie, Jono or your agent.

1. Shearing tag A22205; Station tag 055

Large framed ram, very square stance with plenty of fleece, and good cover through the underline and legs. This sire with his very correct body type, along with controlled fleece figures identifies him as potentially one who could improve bodyweights and frame size, while maintaining wool quality and definitely improving fleece weight. Sired by Grassy Creek 171 through our AI program which we declared very successful for the Merrignee Stud.

Micron 17.0; SD 2.3; CV 13.5; ComF 99.8; SpinF 15.6; Sire Grassy Creek 171

2. Shearing tag A22206; Station tag 054

Large framed sire with good length of body, long staple length and clearly defined crimp. Wool cover is very good and plenty of fleece through the underline. This superfine sire has the wool quality along with frame size to improve superfine merino flocks.

Micron 15.8; SD 2.4; CV 15.2; ComF 99.8; SpinF 14.7; Sire Grassy Creek 171

3. Shearing tag 22204; Station tag 141

A ram showing very stylish fleece character with distinctive crimp and soft handle. These wool qualities come from a supple skin type which will genetically pass onto his progeny. He has plenty of fleece weight and good body type, square stance along with good figures shows his genetic abilities as a merino sire for superfine flocks.

Micron 17.2; SD 2.4; CV 14.0; ComF 99.9; SpinF 15.9; Sire Uniform family

4. Shearing tag 22209; Station tag 002

Another Grassy Creek blood ram showing very good body and size coupled with plenty of length, also very well covered with good belly wool giving a heavy cutting fleece. A fleece showing very good superfine style with high quality crimp definition giving this sire attributes to improve merino flocks.

Micron 17.6; SD 2.8; CV 15.9; ComF 99.8; SpinF 16.5; Sire Grassy Creek 171

5. Shearing tag A26039; Station tag 038

Another very correct merino sire with good body size, square stance with high fleece weight and low micron. Style of fleece is also top grade with soft handle and defined crimp, with these combined qualities and excellent figures this sire could be a financial improver in fine wool merino sheep.

Micron 16.5; SD 2.7; CV 16.4; ComF 99.9; SpinF 15.5; Sire Uniform family
